

### **Colour Palette:**

- They appreciate the designer's choice of colour palette.

### **No Payment Gateway:**

- It's noted that there's no need for a payment gateway on any pages, which aligns with our intention to keep the platform focused solely on networking and collaboration.

### **Detailed Networking Insights:**

- Providing detailed networking insights, particularly through location-based mapping of members, enhances the user experience and facilitates meaningful connections.

### **Collaboration Interest Sharing:**

- Allowing members to share their collaboration interests before publication is a valuable feature that promotes engagement and facilitates targeted networking.

### **Prioritisation of Content:**

- Understanding that papers, awards, and patents are not the main priority helps us focus on the core functionalities and objectives of the platform.

### **Granularity of Idea Flow:**

- It's noted that there's a concern about the granularity of the idea flow. We'll work on refining the user experience to ensure that the platform's features are intuitive and easy to navigate, without overwhelming users with too much detail.
