

1. Network Insights Page :

- a. Change the name of the page to something that's easily understandable to public
- b. Move the page to public access and not just member only
- c. Liked the search and filter idea on the page so keep that
- d. One of the must have features for this website.

2. Search Paper Page :

- a. No need to have a page which gives the user the ability to read the paper, just simple redirection to CEEA is enough

3. Innosphere Page :

- a. Rename the page to something that is more understandable by the public like Community Page.
- b. One of the must have features for this website.

4. Admin Access Page :

- a. Completely remove this, no need for such a functionality
- b. Remove the admin login as well, this should be easy maintenance

5. Users should have the ability to sign up to this SIG.

6. The website will be accessible by every device, so design should accommodate phone, tablet and desktop.

7. The website should focus more on the researchers and their research interests and not papers. The user must be able to network with other members as well.

8. The members must be able to edit their profile information.

9. Minimum maintenance maximum result
