

1. We need to justify our slogan the next time we give our demo
2. Use actual data and not some placeholder data, the clients were very disappointed that we used placeholder data.
3. Search bar functionality must work as expected, simply displaying a search bar is not good design. Also edit the search bar for something more aesthetic and pleasing.
4. **Proper functionality of all pages must be designed and executed by the next demo without fail.**
5. A general feedback was that the website is designed for this SIG (Humanities and Engineering) and not for CEEA.
